My Personal Keyboard Shortcuts

I have created the keyboard shortcuts shown in the table below. They are implemented in VBA through a procedure that works for both Mac and Windows versions of Excel. This is an advanced method of assigning keyboard shortcuts but I walk you through it in the video if you are interested. The shortcuts are demonstrated in the screencast starting at 13:02, so you can assess whether it is worth your time. The instructions for installing them begins at 23:21.

Shortcut	Action
Ctrl-W	Automatically resize column width
Ctrl-R	Right-align cell contents
Ctrl-E	Center-align cell contents
Ctrl-Shift-E	Center-align across multiple cells
Ctrl-L	Left-align cell contents
Ctrl-Shift-O	Reveal hidden columns in selection
Ctrl-.	Increase number of significant digits
Ctrl-,	Decrease number of significant digits
Ctrl-Shift-.	Increase zoom by 10%
Ctrl-Shift-,	Decrease zoom by 10%
Ctrl-Shift-"-"	Zoom to 100% (ie no zoom)
Ctrl-Shift-V	Paste copied cells as values
Ctrl-Shift-F	Paste copied cells as formulas
Ctrl-Shift-A	Create thick border around selected cells
Ctrl-Shift-B	Create border along bottom of cells
Ctrl-Shift-T	Create border along top of cells
Ctrl-Shift-R	Create border along right of cells
Ctrl-Shift-Z	Remove all borders from selected cells
